

Exclude Student from Assignment

Excludes Student from Assignments – mark of NA and TX

NOTE: Colors appear when “Grading Complete” has been checked.

The screenshot shows a table with columns for Name, Grd, %, Mark, and Score. The first row shows a student named Alyunan, Tracy with a grade of 10, a percentage of 93.4, and a mark of A. The Score column is split into two sections: a blue section for 'Ch21: HOS' and an orange section for 'CN 22-3'. The blue section shows a score of 100 for assignment #37, and the orange section shows a score of 3 for assignment #38. Red arrows point from the 'Grading Complete' note to the blue and orange sections, and from a text box below to the NA and TX entries in the Score column.

	Name	Grd	%	Mark	Score
1	Alyunan, Tracy	10	93.4	A	NA TX

Enter values where scores would be placed

If a score is not to be included in a student's final grade, Enter NA (Not Applicable) or TX (Temporarily Excused) in the Score field for the assignment selected.

The score field will display in GRAY if NA or Orange if TX was entered for an assignment and is not included in a student's final grade.

This will make the Max Score zero for this assignment for the student selected. For example, a student is dropped from the class and does not complete the assignment.
