

Sports Field Bypass Switch (Coach's Switch)

SiteOne Green Tech shall provide a sports field bypass switch upon request. This assembly comes with one, two or three switch option. The assembly shall be installed inside of a NEMA 3R® locking stainless steel enclosure. The enclosure shall be a wall-mount type enclosure. The dimensions of the enclosure are 10"L x 8"H x 4"D. The primary power supplied to the assembly shall be 120VAC/ 1PH. The assembly shall include a 120VAC to 24VAC transformer. Each toggle switch shall be of the 'ON/OFF' configuration. Each toggle switch will have an engraved plastic label. The toggle switch will be wired to a terminal strip (24VAC). It is up to the purchaser to communicate the name of the label(s) to SiteOne Green Tech before ordering. The assembly is shipped loose and is to be installed by others.
