**THIS AGREEMENT** becomes binding between the Contractor and the Madera Unified School District, hereinafter called the District, upon: Issuance of a Purchase Order and signature of acceptance on the Bid Form by the Director of Purchasing.

**WITNESSETH:** That the Contractor and the District for the bid and consideration hereinafter names agree as follows:

**ARTICLE 1. It is specifically agreed that the District shall have the right to request any alterations, deviations, reductions or additions to the Contract or Purchase Order or the Plans or Specifications or any of them and the amount of the cost thereof shall be added to or deducted from the amount of the Contract or Purchase Order Price aforesaid by fair and reasonable valuations thereof. And this Contract of Purchase Order shall be held to the completed when the work is finished in accordance with the Original Plans and Specifications as amended by such changes.

**ARTICLE 3. DISPUTES.** In the event of a dispute between the District and the Contractor as to an interpretation of any of the Specifications or as to the quality or sufficiency of materials or workmanship, the decision of the District shall for the time being prevail and the Contractor, without delaying the job, shall proceed as directed by the District without prejudice to a final determination by negotiation, arbitration by mutual consent or litigation and should the Contractor be finally determined to be either wholly or partially corrected, the District shall reimburse him for any added costs he may have incurred by reason of work done or material supplied beyond the terms of the Contract or Purchase Order as a result of complying with the District's directions as aforesaid. In the event the Contractor shall neglect to prosecute the work properly or fail to perform any provisions of this Contract or Purchase Order, the District, after three days written notice to the Contractor, may, without prejudice to any other remedy it may have, make good such deficiencies and may deduct the cost thereof from the payment then or thereunder due to the Contractor, subject to final settlement between the parties as in this paragraph herein above provided.

**ARTICLE 4. CONTRACTOR INSOLVENCY.** If the Contractor should be adjudged bankrupt, or if he should make a general assignment for the benefit of his creditors, or if a receiver should be appointed on account of his insolvency, or if he or any of his Sub-contractors should persistently violate any of the provisions of the Contract, Purchase Order or Agreement, or if he should persistently or repeatedly refuse or fail, except in cases for which extension of time is provided, to supply enough properly skilled workmen or proper materials, or if he should fail to make prompt payment to Sub-contractors or for materials or labor, or persistently disregard laws, ordinances or the instructions of the District, then the District may serve written notice upon the Contractors of its intention to terminate the Contract or Purchase Order, such notice to contain the reasons for such intention to terminate the Contract or Purchase Order, and unless within five (5) days after the serving of such notice, such violations shall cease and satisfactory arrangements for correction thereof be made, the Contract or Purchase Order shall, upon the expiration of said five (5) days, cease and terminate. ## LEAD-PRODUCT(S) CERTIFICATION

TO BE EXECUTED AND SUBMITTED WITH BID

California Occupational Safety and Health Administration (CalOSHA), Environmental Protection Agency (EPA), California Department of Health Services (DHS), California Department of Education (CDE), and the Consumer Product Safety Commission (CPSC) regulate lead-containing paint and lead products.

Because the Contractor and its employees will be providing services for the District, and because the Contractor's work may disturb lead-containing building materials, **CONTRACTOR IS HEREBY NOTIFIED** of the potential presence of lead-containing materials located within certain buildings utilized by the District. All school buildings built prior to 1993 are presumed to contain some lead-based paint until sampling proves otherwise.

The CDE mandates that school districts utilize DHS lead-certified personnel when a lead-based hazard is identified. Examples of lead-certified personnel include: project designers, inspectors, and abatement workers. Furthermore, since it is assumed by the district that all painted surfaces (interior as well as exterior) within the District contain some level of lead, it is imperative that the Contractor, its workers and subcontractors fully and adequately comply with all applicable laws, rules and regulations governing lead-based materials (**Including Title 8, California Code of Regulations, Section 1532.1**). Any and all Work which may result in the disturbance of lead-containing building materials must be coordinated through the District.

The California Education Code also prohibits the use or import of lead-containing paint, lead plumbing and solders, or other potential sources of lead contamination in the construction of any new school facility or in the modernization or renovation of any existing school facility. The Contractor shall provide the District with any sample results prior to beginning Work, during the Work, and after the completion of the Work. The District may request to examine, prior to the commencement of the Work, the lead training records of each employee of the Contractor.

If failure to comply with these laws, rules, and regulations results in a site or worker contamination, the Contractor will be held solely responsible for all costs involved in any required corrective actions, and shall defend, indemnify and hold harmless the District, pursuant to the indemnification provisions of the Contract, for all damages and other claims arising therefrom. If lead disturbance is anticipated in the Work, only persons with appropriate accreditation, registrations, licenses and training shall conduct this Work.

It shall be the responsibility of the Contractor to properly dispose of any and all waste products, including but not limited to, paint chips, any collected residue, or any other visual material that may occur from the prepping of any painted surface. It will be the responsibility of the Contractor to provide the proper disposal of any hazardous waste by a certified hazardous waste hauler. This company shall be registered with the Department of Transportation (DOT) and shall be able to issue a current manifest number upon transporting any hazardous material from any school site within the District.

THE UNDERSIGNED HEREBY ACKNOWLEDGES, UNDER PENALTY OF PERJURY, THAT HE OR SHE HAS RECEIVED NOTIFICATION OF POTENTIAL LEAD-BASED MATERIALS ON THE OWNER'S PROPERTY, AS WELL AS THE EXISTENCE OF APPLICABLE LAWS, RULES AND REGULATIONS GOVERNING WORK WITH, AND DISPOSAL OF, SUCH MATERIALS WITH WHICH IT MUST COMPLY. THE UNDERSIGNED ALSO WARRANTS THAT HE OR SHE HAS THE AUTHORITY TO SIGN ON BEHALF OF AND BIND THE CONTRACTOR.

# Armor® Crack Repair System Product Specifications

## DESCRIPTION:

The **ARMOR® Crack Repair System** utilizes a specially knitted fabric that expands as the crack widens. Fabrics that do not expand (such as fiberglass) simply tear or delaminate as the crack widens during the cold winter months. Our fabric, however, stretches similar to t-shirt material. The secret to making our fabric work best is how it is purposely NOT bonded to the court in the vicinity of the crack (sometimes called a "slipsheet"). This allows more movement of the crack without the fabric tearing or delaminating from the surface. Thus, the reason why the **ARMOR® Crack Repair System** works so well is that it effectively spreads the stress of the crack over a six-inch wide area of expandable fabric.

Although the **ARMOR® Crack Repair System** will not prevent cracks from developing elsewhere on the court, or prevent cracks from growing in length out beyond the repair, it has successfully kept repaired structural cracks from reappearing on the surface of tennis courts for as long as 15 years. There are some limitations and not all cracks are repairable with our product, so talk to your contractor about your specific court.

## OTHER CRACK REPAIR SYSTEMS:

All crack repair "systems" are not the same. **ARMOR®**, the original fabric crack repair system, is the benchmark to which all other systems compare. Saying their crack repair system is "just as good as **ARMOR®**" doesn't mean it's true. Of the three most popular crack repair "systems", the **ARMOR® Crack Repair System** is the only one that utilizes the proven "slipsheet" technology described above. The completed **ARMOR®** repair is the widest of all repairs at thirty-six inches. Narrow repairs tend to delaminate. And, most importantly, **ARMOR®** employs two layers of expandable fabric over the crack, whereas the other systems use only one layer. Other systems are promoted as being "faster to install", since one layer is faster to install than two. But, two layers are proven to last twice as long.

## SURFACE PREPARATION:

The existing surface must be clean and contaminate free. The repair will not stick to dirt, mildew, pollen, dust, leaves, or loose paint. Scraping the surface of the court and blowing off all the debris is usually adequate; however, pressure washing the court surface is sometimes necessary. In those cases, the cracks should be filled first to prevent water from going into the cracks during pressure washing.

Remove all previous crack repair materials that are loose or not bonded well to the court, including any rubberized crack filling material. If you can peel up the old repairs or the existing surface coatings, then they must be removed in order to provide a sound base for the **ARMOR® Crack Repair System** to adhere. This repair will only be as strong as the surface to which it is bonded.

## INSTALLATION:

Installation of **ARMOR®** does not leave margin for error; therefore, it is not a do-it-yourself product. **ARMOR®** is sold to and installed by tennis court contractors who have the tools and experience necessary to understand the application. It is absolutely imperative that **ARMOR®** is installed according to our explicit DVD video instructions. Any deviation during installation may cause this system to fail.

## LIMITATIONS:

- Do not install when the temperature is below 70° F or when the temperature goes below 60° F overnight.
- Do not install on overcast days (direct sunlight, not high temperatures, dries the repair best).
- Do not install after it has rained. Give the cracks time to dry out.
- Do not install when rain is predicted or likely.
- Do not install on dirty, damp, or cold surfaces.
- Do not install on cracks that emit moisture.
- Do not install with in-line skating materials as they are too brittle to expand.
- Do not install using Asphalt Emulsion or over old or peeling Asphalt Emulsion.
- Do not use a rubber squeegee or broom to apply the glue and fabric.

## WARRANTY:

The methods and techniques represented in the **ARMOR® Crack Repair System** literature have been used successfully to achieve the results described based on our many years of experience. The decision to use any of these methods or techniques, or to use this product, is solely the choice of the user. The **ARMOR® Crack Repair System** warrants our products to be of merchantable quality. There are no other warranties either expressed or implied or which extend beyond the description of the face hereof. We do not have control of the installer, the application process, the ingredients used, or the weather in which it was installed. In other words, we can not be responsible for job conditions nor quality of workmanship and, therefore, we can not warranty the completed **ARMOR® Crack Repair System**. This product is not designed to repair all types of cracks. Before using, the user shall determine the suitability of this product for the intended use and the user assumes all risk in connection therewith. This warranty gives you specific legal rights which may vary from state to state.
