Madera High School Robotic Team Ranked #1 in the World

Madera, Calif. - Madera High School's Madtown 1323 robotics team is ranked #1 in the world going into the world championships in Houston during spring break. Madtown 1323 has 6 weeks to conceptualize, manufacture and program the robot they will be using in the championships. This year the team only has a total of 15 dedicated students to complete this gargantuan task.

Central Valley Regional - the team went 16-0 to win the event. They were awarded the Autonomous Award sponsored by Ford. This award celebrates the team that has demonstrated consistent, reliable high performance during match autonomous periods. Evaluation is based on the robot's ability to sense its surroundings, position itself within the field, and plan and execute tasks.

Sacramento Regional - The team record was 15-0 clinching their 2nd Regional competition. They were also awarded the Quality Award sponsored by Motorola Solutions Foundation. This award celebrates machine robustness in concept and fabrication.

The team is hosting a $20 Movie Mixer at Movies Madera (Madera's Movie Theater) on April 4 at 6:30 p.m. All proceeds will benefit the team’s trip to Houston.

See the image below comparing Madtown 1323 to all other teams in the world.
Madera Unified School District was established in 1966. The District aspires to be widely recognized throughout California as a leader in education, where the futures of children are driven by their aspirations and *inspired* by their circumstances.
