MEtoBE: First in Nation Multiple Measures Report Created at Madera Unified School District

Madera, Calif.- Madera Unified School District has developed a local multiple measures system to determine overall grade-level readiness for each student. Madera Unified believes that grade level readiness is more than a single test score or data measure, for this reason Madera Unified uses multiple measures to determine grade level readiness. That is why the district developed the first in the nation Grade Level Readiness report called MEtoBE. This report sprouted from the idea of helping students grow. Each student has a story, and the MEtoBE report was specifically developed to help students tell their unique stories. It is an individualized booklet containing multiple data points that make up a student's grade level readiness score.

It is a one-stop-shop providing a more complete view of how a child is doing, keeping in mind that each student is growing and learning as they go. All 2nd to 6th-grade students across Madera Unified will receive a MEtoBE Grade Level Readiness report during the parent-teacher conference week starting October 21.

If you would like to cover this story, we can make a parent, teacher and an administrator available for one on one interviews. We can also provide you with a video b-roll of the reports, and video of a parent-teacher conference, already previously captured. You can contact me on my cell phone (559) 395-5533 or email me at GeorgeGarnica@maderausd.org for more information. Also on this email is a link to a promotional video to help explain even further this amazing newly developed report.
