Madera, Calif. - Madera High School's Madtown 1323 Robotics team won the FIRST Robotics World Championship in Houston. This is the second time that a team from the Central Valley has ever won the World Championship. A parade will be held at 10 am on Saturday, April 27 to celebrate the World Championship. The parade will begin at the Madera Unified District Office and end at N street by the stadium. After the parade is complete, members of the community will have an opportunity to meet the students, mentors and other staff members who were a part of the team. The flyer below includes more details about the event.
Madera Unified School District was established in 1966. The District aspires to be widely recognized throughout California as a leader in education, where the futures of children are driven by their aspirations and inspired by their circumstances.
