

## Using RenLearn On-line

All teachers and students use the same link to reach their RenLearn data.  
That Link is:

<https://hosted273.renlearn.com/277403>

**This link will need to be bookmarked on all computers using this online product.**

When at this window the appropriate choice should be made.

Teachers can access their student usernames and passwords after logging in by choosing:

STAR Reading > Reports > Administrative Reports > Student Information

This will generate a list of your students' names and passwords.

The image shows a student login form. At the top, it says "Student" with a person icon. Below that are two input fields: "User Name" and "Password". To the right of the "User Name" field is a link that says "Forgot Your User Name?". Below the input fields is a blue button with the text "Log In" and a right-pointing arrow.

Students may also look up their own user names by following the directions after choosing "Forgot Your User Name?". They can choose their school and type their name for a lookup. Student usernames are generated by the system. The student's password is their MUSD ID number. ( ex. 4321 or 54321 or 654321 )

**Teacher username logins are auto-generated.  
The teacher logins are First Initial and Last Name.**

**Examples ; CEchols or WQuaschnick**

**The generic teacher password at Dixieland is welcome32 (you will be prompted to change this when you first log in). You will need to update our security questions also.**

**The STAR READING monitor password is ADMIN**

I know there is so much to explore in this new environment, and I have hope that I can be of some help in the future. This just gets you in and started with your students. Please forward any RenLearn concerns by emailing your site's help desk. Include RenLearn in the subject line.
